At checkout you will enter your shipping address, and then a "thank you" email will be automatically sent to you. Read the entire "Help for new users" file before you buy. Your computer will be off for the entire installation process. Once you have the software installed, you will need to learn how to use it. The first time you start up AutoCAD, you will see a welcome screen that offers you a series of choices, and these choices are explained in a user guide that you should read before you start. You can also access the AutoCAD Help files and manuals from your toolbar. When you install the AutoCAD software, a wizard will guide you through the setup process. During this process, you will choose which version of AutoCAD you will use (there are several versions available). You can install all three types of AutoCAD (AutoCAD 2002, 2003, and 2004) on one computer, but for a single-user license the software must only be installed on one computer.
