Vietnam, a forum about Vietnamese politics, culture, history, food and travel. Where else can you learn how to make lemongrass tofu fried rice or sausage dumplings? With our forums, you can learn how to make pho, stir fry, and bac bac ri gio. Yes, you can eat! drumcore has quite a following, and it's hard to get a grip on the current state of things. This forum is not about drumming. If you're a drummer, keep it there. Don't even think about joining if you're not a drummer.2D Printers Offer a Valuable Resource in Disaster-Stricken Area Joe and Helen Lamberts' efforts to raise funds to sell small-scale 3D printers (these are the hand-shaped desktop models you see above) have been met by a meaningful level of interest in the printable world. The couple has printed everything from giant teddy bears to anatomical models for students, and now they are applying the same ideas to their home community. Joe and Helen are part of an effort to use 3D printing as a means of delivering new educational tools to underserved communities. Their efforts took a turn when they learned of a friend in New Jersey who had been affected by Hurricane Sandy and was temporarily without power or heat. Without access to computers or any form of high-tech output, he was unable to do anything. His problem could have been easily solved by using a 3D printer, Joe explains: "I showed him the space station that I'd made of something he could sell on the street, and he thought it was a solution." Determined to do something to help, the Lamberts first learned the art of 3D printing by contacting a local design studio, then they set about creating mini 3D printers of their own. With the help of some friends, the couple assembled a number of 3D printers and established a small business enterprise called JPL 3D (Joseph and Helen Labs 3D). Helen says that the few 3D printers available in the area are quite expensive, so those in need will understandably be drawn to their resource. The Lamberts say that they are happy to help people who are interested in learning how to use their printers, but they are also providing one-on-one printing mentoring for people who want to begin using their printers. They have sent one of the
