Powerups to Remember!

When playing for a long period of time, you will receive powerups!

The powerups are:

- **Choose Updaterip**
- **Get +1 Attribute of your choice**

The choices are: STR = Strength, LEI = Luck, INT = Intelligence, AGI = Agility, WIS = Willpower, and DEX = Defense.

Since switching powerups while in battle is done through the action command, even non-action players can receive powerups with that command. When the player performs that command, the powerup icon will appear on the top right of the screen, and will enter red-colored power if you have a negative statistic.

During the offline phase, you will receive random powerups based on the law of probability. However, you will not receive any of the special powerups. When you play the new offline mode, your normal offline powerups will not work, but you can still receive the same powerups that you received while playing online.

In order to perform the powerup action, a player must be injured or be under attack. When you perform the action command, your turn will end and a red circle will appear on top of the injured monster's stats.
